Woman HOROSCOPE

BORN: June 5, 1937

Here is the horoscope chart of *Woman* magazine, "born" 5th June, 1937, at noon in London. For an accurate and complete personal chart the Astrologer must know three things: the date, time and place of birth. The date gives the signs you were

born under and also the main clue to character; time and place give the Ascendant or Rising Sign from which you get your physical attributes. The moon's position is also very important—particularly in a woman's horoscope—as it will indicate the family probabilities. On the Eastern Horizon of the chart are all the Planetary factors that determine the appearance. The mid Heaven can also influence type. People who are extremely typical of their Sun Sign are usually born at sunrise or mid-day. The chart is divided into twelve parts, each of which is called a "House", one for each sign of the Zodiac. Once the astrologer has your complete birth data he proceeds by mathematical calculation to place the Sun, Moon and Planets in their respective Houses. He can then "read" your chart as each house governs a different aspect of your life pattern.

WOMAN IDENTISCOPE

How to judge character by the stars
by PHYLLIS NAYLOR

With the aid of this exclusive booklet you can learn to know yourself and others better, can diagnose the character of everyone you meet

How to use your Identiscope

All of us carry the signature of the stars in our appearance, although few of us are completely typical of our birth sign, since a horoscope is a complex affair, dependent on the hour of birth. This is why a Libra may have a Scorpio chin, and a Gemini a Leo nose.

Knowledge of the birthdate alone is not enough. If you analyse each feature (hair, eyes, mouth, build, hands, etc.) you can find which zodiacal influences are at work. You can then make an accurate assessment of the true character and

personality of anyone you meet. Within the pages of this booklet, we have put all this zodiacal information together, showing you how to build up, step by step, an "identiscope" of the complete person. Above you see a composite picture of the Summer Face (a woman born between 21st March—25th September); on the back cover is her counterpart, the Winter Face (a woman born between 24th September—20th March).

Practice your skill at judging character. You'll find it can be useful as well as fun!
